DATE: March 24, 1994  
TO: Jesse C. & Sandra L. Day 709-3-2500  
FROM: Dewey W. Darold, R.S.  
Environmental Specialist  
SUBJECT: *Dewey Darold* Minor Tank Replacement Permit #94-46

The following conditions apply to the installation of the new septic tank:

- 1) Follow manufacture's directions for tank installation, particularly for poly septic tanks which require filling with water before backfilling to prevent racking of tank and potential collapsing. Use anti-buoyancy where applicable.
- 2) If the septic tank is installed deeper than 18 inches a watertight riser to ground surface is required.
- 3) The inlet and outlet connections to the septic tank must watertight, bedded firmly in original soil with the appropriate piping materials used.
- 4) The existing septic tank must be properly abandoned by a state licensed septage pumper and a copy of the pumping receipt submitted to our office.
- 5) An inspection of the septic tank installation will not be conducted unless specifically requested.
- 6) The septic tank must meet the minimum five (5) foot setback from the building foundation and the ten (10) foot setback to the property lines and the water lines.
- 7) If the septic tank is installed (either homeowner or licensed installer) exactly as indicated on the original approved plot plan, submit an as-built plan within 30 days of the installation specifying that the installation was installed exactly as the original plan showed. If not, show the adjustments on the as-built plan.
- 8) The installation of a new septic tank does not guarantee continuous satisfactory operation of the drainfield or other soil absorption systems.

Jesse C. & Sandra L. Day  
March 24 1994  
Page 2

- 9) A certificate of satisfactory Completion (CSC) will be issued after the as-built plot plan and a copy of the pumping receipt has been submitted to our office.
