RE: 808-27A-1601

Mr. Larson

On September 11, 1979, I performed an on site evaluation of the property identified above to determine whether a subsurface sewage disposal permit could be issued.

As a result of this evaluation, I have determined that the conditions on the site are in compliance with the Oregon Administrative Rules pertaining to standards for subsurface and alternative sewage and nonwater-carried waste disposal. A permit will be granted when the required plot plan and fee are received by the department. Please see RESTRICTIONS LISTED BELOW.

Sincerely,  
*Ray T. Franklin*

Ray Franklin, R.S.  
Department of Environmental Quality

RESTRICTIONS:

- 1) Provide an absorption area of 600 square feet with a minimum septic tank capacity of 1,000 gallons for the proposed 1-4-bedroom home.
- 2) Place the drainfield in the approved area.
- 3) No part of the drainfield can go any further south than the test hole.
- 4) Maximum trench depth is not to exceed 24 inches.
- 5) Any extreme alteration of the natural soil profile in the approved area could void this approval.
- 6) Submit a detailed plot plan and obtain a sewage disposal system construction permit prior to construction. (plot plan enclosed)
- 7) This approval void if in conflict with an local planning or building regulations.

State of Oregon  
DEPARTMENT OF ENVIRONMENTAL QUALITY

CERTIFICATE  
OF FAVORABLE SITE EVALUATION FOR  
INDIVIDUAL SUBSURFACE SEWAGE DISPOSAL SYSTEM  
(Not a permit for construction)

This is to certify that the following described property

808-27-A-1601 Clatsop County, Oregon

has been evaluated on September 11, 1979 and found to be approvable for the installation of one subsurface sewage disposal system in accordance with ORS 454.605 through 454.755 and administrative rules of the Environmental Quality Commission promulgated thereunder.

This approval is given on the basis that the lot or parcel described above will not be further partitioned or subdivided and that conditions on subject or adjacent properties have not been altered in any manner which would prohibit issuance of a permit under the statutes and rules noted above. Any such subdivision, partitioning or alteration voids this certificate.

The subsurface sewage disposal system is to be located on the above-described property as follows:

A system to be located anywhere on the lot or parcel other than as described above will require an additional site evaluation along with an additional fee.

This certification is valid until a subsurface sewage disposal system is installed pursuant to a permit obtained from Department of Environmental Quality or until earlier cancellation, pursuant to Commission rules, with written notice thereof by the Department of Environmental Quality to the then owners according to Department records or the county tax records, whichever are more current. Subject to the foregoing, this certification runs with the land and will automatically benefit subsequent owners of the land.
